

201 E

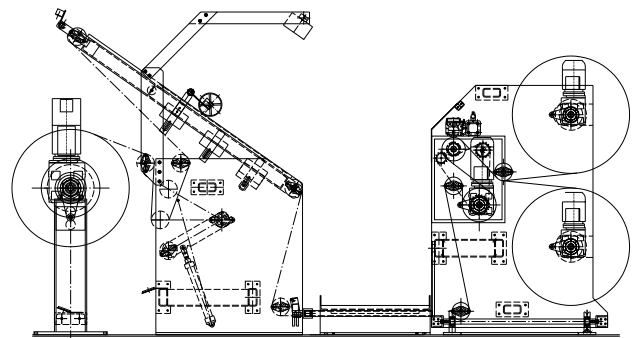

Winding, inspection and cutting machine

For the processing of fleece, non-woven and other materials

Consisting of:

- Unrolling
- Inspection table
- Tensioning station
- Slitting system (pinch cutting: cold-hot)
- Winding system with winding shafts that can swivel out

Technical data:

Working width	up to 4,000 mm
Unit speed	up to 60 m/min.
Unwinding roll diameter	up to 1,800 mm
Winding roll diameter	up to 800 mm
Controller	PLC Siemens S7 – 300
Voltage:	depending on the order
