

202 E

Universal winding-off for fabric inlet, carding machine etc.

For the processing of textiles, non-woven and other materials

Consisting of

- Winding off (driven)
- Jockey device (speed synchronization)
- Automatic control for constant fabric tension
- Switch and control box

Technical data

Working width	up to 4.600 mm
Unit speed	up to 60 m/min
Winding roll diameter	up to 1.600 mm
Controller	Frequency control
Voltage	Depending on the order
