

Unwinding-, inspection- and cutting machine

For processing of all web-type materials

Consisting of:

- Unrolling (height adjustable and moveable)
- Length-cutting (scissor cut)
- Dancer unit for sensitive web tension
- Meter counter
- Inspection table with up & down light (dimmable)
- Edge cutting (crush cut) (middle and edge, manual adjustable, pneumatic working)
- Edge cutting pull-off unit
- Ascending batch winder (individual drive)
- Ejector (pneumatic)
- Line control unit for straight-edge winding
- Packing unit
- Unwinding unit for packing foil

Technical data

Working width	up to 5.200mm
Unit speed	100m/min
Wind-up and wind-off diameter	up to 1.600mm
Reversing rolls	Alu anodized
Running direction	forwards / backwards
Drives	frequency controlled
Control	SPS
Voltage	Depending on order
