

## Turret winder

Winding of material web in a continuous winding process

### Consisting of:

- solid frame
- driven shaft axle (friction shaft) supported in bearing caps
- fly cutter (pneumatic movable)
- guide roller (Alu eloxadized)
- pressure roller pneumatic moveable (gummed)

### Technical data

Working width	up to 2.200mm
Unit speed	up to 100m/min
Winding diameter	up to 1.500mm
Controller	SPS Siemens S7-300
