## Winding and Inspection System especially for ribbon fabric (Primary Carpet Backing) (Secondary Carpet Backing)

### Consisting of:

- Center winder (driven)
- Compensating device
- Inspection table (illumination from above/below)
- Spreader roll
- Meter counter
- Web tension control
- Foot pedal
- Rising roll batch winder (individual drives)
- Web edge steering for the winding of coils with alignment of the edges
- Lay-on roll for the winding of tight coils
- Coil ejector
- Cross cutting device (hot wire)

### Technical Data

Working width	960 to 5400 mm
Unit speed	60m/Min.
Wind-up and wind-off diameter	up to 1.200 mm
Reversing rolls	hard chrome plated
Running direction	forwards/backwards
Drives	frequency controlled
Control	SPS Siemens S7-300
Voltage	depending on order
