

drying and heating systems for drying and heating of customized materials

technical details -optional-

- contact-, air-circulation-, IR-, UV-drying
- heating medium electrical / natural gas
- conveyor systems stack oven / paternoster
- drying continuous / discontinuous
- oven bottom with forklifter driveable
- heating temperature customized
- drying material customized

technical details -individual-

working width	up to 5.800mm
machine speed	up to 200m/min
materials	customized
